Anastasiia T.
6/27/2025 7:29 PM

Assigned To

T19: Registration with too weak password

Status	Type	Priority	Estimate
Failed	Smoke & Sanity	High	5 minutes
References	Automation Type		
None	None		

Preconditions

Open the website <https://buggy.justtestit.org/>
User already has a registered account
Open the Register page

Steps

1	Enter a password that is long enough but weak (e.g., "123456789Aa") in password field	The password input accepts the entered value; however, the system detects the password strength as weak and visually indicates this (for example, by displaying a warning message near the password field or changing the border color to yellow/red)
2	Enter the same weak password (e.g., "123456789Aa") in the confirm password field	The confirm password field accepts the value; the system checks for match between password and confirm password fields and confirms they match. The password strength warning remains visible until addressed
3	Fill other fields (login, first name, last name) with valid data	All other fields accept input correctly, with green borders indicators; no error messages appear for these fields

Password must have symbol characters

Results

Failed

Anastasiia T.
6/27/2025 7:34 PM

This test was marked as 'Failed'.

Steps

1

Enter a password that is long enough but weak (e.g., "123456789Aa") in password field

Password

Confirm Password

Register

Cancel

Expected Result

The password input accepts the entered value; however, the system detects the password strength as weak and visually indicates this (for example, by displaying a warning message near the password field or changing the border color to yellow/red)

Actual Result

The system did not provide any visual indication of weak password strength while typing. The warning message appeared only after clicking the "Register" button

2

Enter the same weak password (e.g., "123456789Aa") in the confirm password field

Password

Confirm Password

Register

Cancel

Expected Result

The confirm password field accepts the value; the system checks for match between password and confirm password fields and confirms they match. The password strength warning remains visible until addressed

Actual Result

The "Confirm Password" field accepts the input and the system successfully verifies that the passwords match, displaying a confirmation message. However, no warning or visual indicator is shown for weak password strength

3

Fill other fields (login, first name, last name) with valid data
