C42: Registration with too weak password

Type	Priority	Estimate	References
Smoke & Sanity	High	5 minutes	None
Automation Type			
None			

Preconditions

Open the website <https://buggy.justtestit.org/>
User already has a registered account
Open the Register page

Steps

1	<p>Enter a password that is long enough but weak (e.g., "123456789Aa") in password field</p> <div><div>Password</div><div>.....</div><div>Confirm Password</div><div>.....</div><div>RegisterCancel</div></div>	<p>The password input accepts the entered value; however, the system detects the password strength as weak and visually indicates this (for example, by displaying a warning message near the password field or changing the border color to yellow/red)</p>
2	<p>Enter the same weak password (e.g., "123456789Aa") in the confirm password field</p> <div><div>Password</div><div>.....</div><div>Confirm Password</div><div>.....</div><div>RegisterCancel</div></div>	<p>The confirm password field accepts the value; the system checks for match between password and confirm password fields and confirms they match. The password strength warning remains visible until addressed</p>
3	<p>Fill other fields (login, first name, last name) with valid data</p> <p>Register with Buggy Cars Rating</p> <div><div>Login</div><div>Anastasiia4</div><div>First Name</div><div>Anastasiia4</div><div>Last Name</div><div>Tysiak4</div><div>Password</div><div>.....</div><div>Confirm Password</div><div>.....</div><div>RegisterCancel</div></div>	<p>All other fields accept input correctly, with green borders indicators; no error messages appear for these fields</p>

4

Click the Register button

The system either blocks the registration due to weak password, displaying a clear error message instructing the user to choose a stronger password, or registers the user but issues a warning recommending a stronger password
